ROOSTER

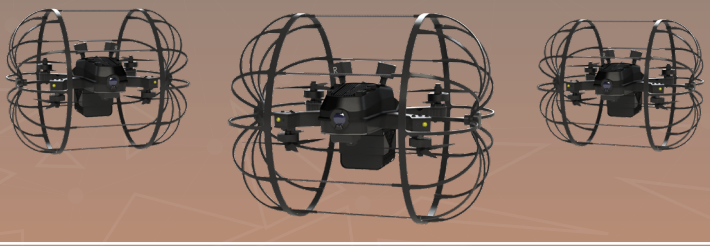

THE ULTIMATE INDOOR DRONE SYSTEM

HYBRID ROBOTIC DRONE

Used by modern militaries, special forces, first responders for a variety of missions: ISR, search & rescue and SWAT . The Rooster is a revolutionary hybrid system for indoor and underground unmanned missions using MESH communication. **It rolls! it flies! it's the ultimate indoor tactical reconnaissance system.**

THE SYSTEM CONTAINS

3 Rooster drones

Control unit

Ruggedized case

OPERATIONAL USE

Combat-proven / Indoor & outdoor missions

Subterranean environment / Communication deprived areas

FIRST IN, LAST OUT

SYSTEM CAPABILITIES

Mesh communication
Multiple Roosters operated simultaneously by a single operator and have high-quality transmissions in communication-deprived environments.

Hybrid
Fly as a drone Roll as a robot.

Enhanced energy efficiency
For extended operation time while rolling.

Easy to use
Easy to assemble, easy to carry, easy to control.

Optional payloads
For wide range variety of missions.

Robust cage protection
Rolling propeller guard design.

Specially designed for confined spaces
Tunnels, inside buildings and in communication-denied areas.

SPECS

Weight **1620 gr**	Communication frequency **2.1 - 2.5Ghz**
Max roll time **35 min**	Communication topology **Mesh (3 platforms)**
Max hovering time **12 min**	Video format & resolution **1080p/720p/480p**
Payload option **300 gram**	Camera type **Day / Low light / NIR**
Typical mission time **Up to 90 min**	Lens angle **130° HFOV, 90° VFOV**

ADDITIONAL VARIOUS PAYLOADS

Custom-made payloads by client demand (Option)

TC-54
Thermal camera

RS-X5
Radiation sensor

OS-91
Oxygen sensor

COMMANDER UNIT *(OPTION)*

Watch the Rooster in action from a mobile platform, from anywhere & always! stay in control as the mission goes.

ROBOTICAN is an Israeli company, privately owned, developing and manufacturing intelligent autonomous UAS, UGV's & robotic solutions. Since 2013 we are making smart-tech products for a safer world.
